 **TOOL**

Adopt the right reflexes

Title : Adopt the right reflexes | *Developed by* : IFFO-RME

Topics : Risks | *Website* : <https://www.iffo-rme.fr/avez-les-bons-reflexes/>

Description

Online platform to help you adopt the right reflexes in the event of major risks, including natural and technological risks.

Key features:

- Easy to use;
- Get a risk awareness poster.

Duration

20 min

Resources needed

To use the tool, we need:

- Computer;
- Videoprojector.

Age

9+ years old

Relevance to CRISEPAC Objectives

This tool responds to the objectives of the CRISEPAC project, focusing on prevention and preparation for natural disaster in schools.

Expected outcomes

- Allows to choose risks on display included facility informations and the behaviour to adopt in the event of a disaster;
- Introducing children to risk preparedness.

TOOL

Adopt the right reflexes

Management

The teacher only needs to project the application using the video projector and interact with the class.

Risk prevention

This application teaches what to do in the event of a natural risk.

Others

Weaknesses

It is important to find out in advance about the risks in your school and the right reflexes to adopt before presenting the event.

Strengths

- Produces a visual;
- Cover the different risks that exist in a local area.

Possible adaptations

This tool can be used to complement another tool or a class on natural risk prevention.

Climate change

Natural hazards will be much more intense and more common because of climate change.

Adopt the right reflexes

Methodologies

Simply fill in the online form and adapt it to your school with the children.

IFFO-RME: Institut français des formateurs des risques majeurs et protection de l'environnement (French Institute of Trainers in Major Hazards and Environmental Protection).
